#### Exam Detail

Appearance	Normal	Pet appears bright, alert, and responsive.  Body condition score (scale 1 to 5) : 3/5 aural temp: 100.7
Eyes	Abnormal	vestigial, nonvisual globes OU
Ears	Normal	Ears are clean with no excess discharge. There is no evidence of infection or mites.
Nose/ Throat	Normal	No nasal discharge. No palpable thyroid enlargement.
Oral	Normal	Mouth is normal in appearance. Teeth and gums are in good condition without evidence of gingivitis.
Cardiovascular	Normal	The heart sounds and rhythm are normal. No murmurs or irregular beats are heard. Pulses are strong and regular.
Respiratory	Normal	Lung sounds are normal on both sides. No coughing or excess respiratory effort noted.
Digestive/ GI	Normal	No abnormalities with digestive function noted. Abdomen palpates normal with no discomfort.
Urogenital	Abnormal	Urinary and reproductive systems appear normal. Probably cryptorchid male but difficult to tell - doesn't tolerate close inspection of UG area
Musculoskeleta	Normal	Muscle tone is normal. No evidence of arthritis or other musculoskeletal disease is noted.
Neurologic	Normal	All reflexes and neurologic functions appear normal.

Dermatology      Normal      Skin and coat appear normal.    Pet is not excessively itchy.    No areas of fur loss seen. No abnormal odor detected.

Lymph Nodes      Normal      All peripheral lymph nodes are normal in size and non painful.

Recommend (Fel Normal

### Notes

1:57 PM - OCT 19 24 - JP

A: 19 week M? DSH presented for next kitten visit  
congenital malformation of globes  
cryptorchid - appears to be male but won't tolerate close inspection of UG area but no palpable testicles  
  
otherwise appears healthy

P: Wendy here for appt  
she did send out genetic testing - hasn't results as yet (not sure how meaningful it will be)

rec bilateral enucleation  
rec neuter/OHE  
probably as 2 separate surgeries

FVR 1yr sq right shoulder  
Rabies 1yr sq right hip  
FeLV sq left hip

using terramycin to try to control ocular discharge but is difficult - requested drops  
tobramycin 1 drop ou

1:13 PM - OCT 25 24 - JP

spoke to Dr. Marci - Casper is large enough for her to consider doing the enucleations anytime and she would also neuter at same surgery.

92010	VACCINATION MEMO	1.00	OCT 19 24	Accepted
Your pet received either one or more vaccinations today. Vaccine reactions are rare but please monitor your pet for any changes that could indicate a problem. Most animals will not exhibit significant changes following vaccines, some will be a little quieter for 24 hours. This would be considered normal. Any profound lethargy, vomiting, facial swelling, or lack of appetite beyond 24 hours should be brought to our attention. Please call us if you have any concerns.
