Recommend (Fel Normal

Notes

12:50 PM - SEP 28 24 - JP

A: ~ 4 month M DMH presented for recheck
 had mild otitis
 ocular abnormalities
 cryptorchid
 conjunctivitis

still cryptorchid

P: Wendy here for appt
 ear infection resolved
 FVR #1 sq right shoulder
 FeLV #1 sq left hip

next visit in 3 weeks for FVR, FeLV and Rabies
 other cats in HH have had vasectomies rather than castration, not recommended if this cat remains cryptorchid

also consider enucleation of residual ocular tissue

92010 VACCINATION MEMO 1.00 SEP 28 24 Accepted

Your pet received either one or more vaccinations today. Vaccine reactions are rare but please monitor your pet for any changes that could indicate a problem. Most animals will not exhibit significant changes following vaccines, some will be a little quieter for 24 hours. This would be considered normal. Any profound lethargy, vomiting, facial swelling, or lack of appetite beyond 24 hours should be brought to our attention. Please call us if you have any concerns.

91007 NEXT DOCTOR VISIT IN (X) WKS 3.00 SEP 28 24 Accepted

Schedule the next vaccine visit for the number of weeks marked in the quantity column.
