Animal Information

Name: Teddy
Species: Dog Cat Other:
Birthday/age: 6/21/23
Breed:
Color/markings: Cream/white

Male Female

Where can we reach you today?

Health History: Rabies vaccinated Yes/No Heart worm tested? Yes/No FELV/FIV tested Yes/No Spayed/neutered Yes/No

All spay/neuter surgeries include a pre-anesthetic or sedated exam, pain injection, antibiotic injection, nail trim (not for cats), and e-collar (dogs only, we do not provide e-collars for cats unless advised by the veterinarian). All cats and dogs must be vaccinated for Rabies and Distemper. If your animal is not current on vaccinations we will vaccinate for an additional cost. We strongly recommend all dogs to have had a heart worm/Lyme test within the past 12 months and be up to date on heart worm and flea/tick prevention. All cats are recommended to be tested for feline aids/leukemia. We offer these services at an additional cost.

CONSENT FOR TREATMENT

I have been advised of the nature of the procedure requested as well as any additional procedures deemed necessary by the Veterinarian. I understand that there is a risk of complication and/or death associated with surgery and anesthesia. I authorize the clinic staff to take necessary steps to ensure the safety of my animal.

*All feral cats should be brought in covered traps.
